Subject: Seeker RAM software for the CM-2

Barbara Lincoln informs me you are interested in the new Seeker RAM Information Retrieval system we've build for the Connection Machine.

How would you like me to deliver it to you? The software is available as a set of binary executables for a Sun4/CM-2 running SunOS 4.1 and CMSS 6.1. The archive runs about 3 Megabytes (compressed). I can uuencode, split and mail it to you, we can use FTP, or we could mail you a QIC-150 cartridge tape. Whatever is easiest, let me know.

Subject: WAIS release  
Cc: mmiller@ncsa.uiuc.edu, rkufirin@ncsa.uiuc.edu

Hello Barbara,

This request may be a repeat (you may have already gotten this from NCSA recently; if so my apologies). We are interested in learning more about the new WAIS release. Would you please send any relevant information to us? The proper person to contact would be Marcia Miller, who is our software coordinator. Ms. Miller's email address is mmiller@ncsa.uiuc.edu. US Mail is

Marcia Miller  
NCSA  
605 E. Springfield Ave.  
Champaign, IL 61820

We are particularly interested in licensing, cost (academic discounts), etc.

Thanks very much,  
Rick Kufrin, NCSA
